

## MODEL 1209

## Fixed Orifice Double Regulating Valve

## SIZE RANGE

DN65-600

## PRESSURE RATING

PN16 / PN25

## CONSTRUCTION

Ductile Iron ASTM A536 65-45-12

## CONNECTION

Flanged

## TEMPERATURE

-10°C to 120°C

Fixed-orifice hydronic balancing for facility cooling-water distribution. State design flow, required commissioning measurements and the available differential pressure.

Control Function: Static balancing

### APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

### CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

### DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
