

MODEL 1210

Variable Orifice Double Regulating Valve

SIZE RANGE

DN65-600

PRESSURE RATING

PN16 / PN25

CONSTRUCTION

Ductile Iron ASTM A536 65-45-12

CONNECTION

Flanged

TEMPERATURE

-10°C to 120°C

Variable-orifice hydronic balancing for facility cooling-water circuits. Select from the design flow and pressure-drop allowance, with setting and commissioning access considered.

View specifications and request project documentation at nordicvalves.com

Control Function: Static balancing

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
