

MODEL 1230-BT

Threaded Dynamic Balancing Electric Control Valve

SIZE RANGE

DN15-50

PRESSURE RATING

PN25

CONSTRUCTION

Brass HPb59-1 / Ductile Iron JS1024

CONNECTION

Threaded

TEMPERATURE

1°C to 120°C

Dynamic balancing with electric control for small facility cooling-water branches. Specify flow, available differential pressure, selected body material and the required actuator signal.

Control Function: Dynamic balancing and electric control

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
