

MODEL 1230-DFY

Flanged Dynamic Balancing Electric Control Valve

SIZE RANGE

DN50-150

PRESSURE RATING

PN16 / PN25

CONSTRUCTION

Nodular Cast Iron

CONNECTION

Flanged

TEMPERATURE

1°C to 120°C

Dynamic balancing and electric flow control for facility cooling-water branches. Confirm the operating differential-pressure window, flow setting and actuator signal for the selected configuration.

View specifications and request project documentation at nordicvalves.com

Control Function: Dynamic balancing and electric control

Seal Material: EPDM

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
