

MODEL 1250-BT

Threaded Differential Pressure Balancing Valve

SIZE RANGE

DN15-50

PRESSURE RATING

PN20

CONSTRUCTION

Brass

CONNECTION

Threaded (ISO 228)

TEMPERATURE

-10°C to 120°C

Differential-pressure balancing for small facility cooling-water branches. Confirm the controlled pressure setting, sensing connections and design flow.

View specifications and request project documentation at nordicvalves.com

Control Function: Differential pressure control

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
