

MODEL 2390

Anti-condensation Butterfly Valve

SIZE RANGE

DN50-300

PRESSURE RATING

PN10

CONSTRUCTION

Aluminium ADC12

CONNECTION

Wafer

TEMPERATURE

-10°C to 100°C

Butterfly isolation for chilled-water pipework with an anti-condensation construction. Specify installation conditions, insulation details and the operating arrangement.

View specifications and request project documentation at nordicvalves.com

Disc Material: Stainless Steel CF8

Seat Material: EPDM

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
