

MODEL GFLEX-F1

Single-sphere EPDM Flexible Rubber Joint

SIZE RANGE

DN25-600

PRESSURE RATING

PN16 / PN25

CONSTRUCTION

EPDM joint; carbon steel / stainless steel flanges

CONNECTION

Floating flanges

TEMPERATURE

-15°C to 115°C

Flexible joint for movement and vibration in facility cooling-water pipework. Confirm flange material, movement, pressure thrust, restraints and the coolant formulation.

View specifications and request project documentation at nordicvalves.com

Seal Material: EPDM

APPLICATION

Facility cooling water. Select the component from design flow, differential pressure and installation requirements.

CONFIGURATION

Confirm the exact size, pressure class, materials and coolant compatibility for the project. Include actuator voltage and signal where electric control is required.

DOCUMENTATION

Dimensional drawings, control details and project certificates are confirmed for the selected configuration. Contact Nordic Valves with the model reference and operating conditions.
